Result

P · Integrated plan — Optimal

Best plan proven within the finite candidate library.

Modeled production **154.1 t**	Tail minimum service **61%**	Groundwater pumped **8,288 m³**
Withdrawal productivity **3.18 kg/m³**	Capital committed **PKR 1,953,216**	Seasonal operating cost **PKR 70,452**

Incremental view

B0→B1 operational gain · B1→P investment gain · P→R risk trade-off. Where greater output also uses more pumping or expenditure, both are shown.
